

I am appalled at the amount of pornography that is available on television. Too readily available to young viewers with the flip of a button. Adults should not even be watching this filth. All pornography should be censored and shut down. All filthy language should be turned off. Families are in peril thanks to the availability of such things. I remember the day when family television dominated the airwaves. Parents were not afraid to let their children set in front of the screen, because they knew the quality of content that would be visible. Please shut this down for the sake of families. Hollywood has had too much influence in the market for far too long.
