

Please do not allow an increase in the amount of nudity and profanity that already exists on television. Is it truly in the best interests of Americans to do so? A very sad day will be hallmarked IF or when the FCC intentionally allows such a good protective measure, like mandatory seatbelt laws, to cease to exist knowing the number of young children being raised by a single parent who, doing their best, may unintentionally allow their child to watch something disturbing to his/her development. Please reconsider.
