

FCC: I am writing this email to request that you will not allow changes to be made allowing more nudity and profanity to be shown on TV during broadcasting hours when children may be watching. Our children see so much already that harms their innocent minds, that they do not need any more of these images and thoughts bombarding them--not to mention the fact that pornography viewed by adults is one of the top problems that destroy marriages and families today, so why do we need to keep adding more and more for public viewing? Please reconsider this course of action and halt any further increase in nudity and profanity on TV. Thank you. Amber Bingham
