

I would like to express my opinion on allowing nudity on public television. I do Not approve of this! I think we as a society have already failed to teach our children to be modest. Just because sex and nudity sell does not mean it is ok to post it everywhere. Do you have kids? Do you allow them to watch this kind of stuff? Tv is already bad enough. There are plenty of shows that already push it to the limit. It is sad that I already have to monitor simple public tv but now this? I mean seriously why dont we just teach them sex education in elementary school. The sad thing are people still have the nerve to wonder why we have such a big teen pregnancy and teen abortion rate. If our society continues to desensitize the subject of sex and nudity then the younger generation will just continue to to think that there is nothing wrong with getting pregnant before you get out of high school. They will see nothing wRong with having a baby befOre they can drive. What about the influx in STDs in teenagers are you really going to say that desensitizing the subject by promoting it does not contribute to the problem.
