

As a concerned citizen, I would like to make my voice heard!

In regards to your public notice as of April 1st, 2013 GN Docket #13-86.

I urge you to enforce the Standard of Decency in Broadcasting Law that has been upheld for almost 100 years.

It is important to protect children especially, during certain times of the day when they will be viewing. Allowing more indecent, and suggestive, previews and commercials negatively influences young minds and should not be allowed.

Please do not summarily dismiss complaints because you do not consider the infraction "egregious". These complaints are important to the citizens that make them. You need to uphold the Broadcasting Laws already in place without alterations or allowances. Please help us protect our loved ones!

Thank you,

Meghan Miera
