

It is a complete outrage that anyone would consider it acceptable to put more nudity and sexual scenes on prime time television, to expose our young generation to even higher levels of pornographic material. If this proposal is passed the moral degradation of our society would be complete. The slippery slope of a sexualized young generation would lead to an increase in young teen and children pregnancies, lack of self-worth of young girls, and an exploitive environment for all who are seeking to be accepted. Do not pass this proposal- the influences of media are so great on children and the outcome would be devastating for our younger generations. It does not matter that sex sells; those in media need to gain back creative and artistic minds to work hard to instill valuable material into entertainment.
