

I am opposed the the FCC relaxing the standards for nudity and expletives in both television and radio. The standards need to protect all of society, and if broadcasting is allowed to include nudity and expletives even if briefly, it has an affect on those watching or listening.

Children watch and listen to programs and need to be protected. The standard needs to consider them. Also there are adults like myself that object to loosening the current standards.

I request that the FCC not change or relax the standards that are currently in place.
