

Basically I believe that prime time television especially a channel supposedly geared toward families should not be putting shows with such adult themes as sex out of wedlock, births out of wedlock, infertility, and birth control. Especially when this channel i.e., ABC Family is geared towards young children, pre-adolescents, adolescents, and teens. As a concerned parent of a two young daughters and a young son I feel that this type of material is inappropriate for a channel passing itself off as family oriented and I feel and think that this subject matter is inappropriate and as a parent I and my spouse should be able to discuss these issues single handedly when we are ready as a family and according to their age appropriateness to discuss the appropriate normative stages. It just makes me pretty much as I could say pissed off!!!! that we have these shows that make little girls appear almost adult like sexually provocative and that my daughter may now want to act and dress like them. What happened to shows such as happy days, and mork and mindy, and flipper, and lassie? I sure miss those times! Please help us maintain our morals and standards and not allow this situation to continue to go decline! I feel an obligation to maintain and protect our nations standards especially when it comes to our children who are our future!!!
