

I live at a large apartment complex and use clearwire wimax. The store where I pay for the service says to me "you gotta be clear".(b.S. I think to myself) The signal is constantly being intercepted by people outside my back door who have occupied spaces and apartments here. because of past problems I have had with an humanist church in the past (Scientology) I am sensitive and anxious about external noises such as these and have been on ssi for years because of the abuse suffered by me at the hand of them and their adherants.

These people openly discuss whatever the feel will irritate me.

They give me the impression there is nothing I can do about their activities which include knowing what i am typing searching, and reading of this wimax connection. I know this sounds paranoid but it is the truth. I am in the silicon valley near where IBM used to be and my self have had security clearances in the U.S. Army MOS 35H. So i can tell by my equipment that these people are ACTIVELY engaged in Jamming and otherwise interfering with my signal and the work I am trying to accomplish i.e. spreading the word on Chinese CHI and healing of self and others simply and easily through understand how the energy of the human body is totally accessable and easily manipulated. Recalibrated even.

They gather in groups on their back porches and openly discuss things that would drive a person to the brink if not for having these ancient secrets at my disposal by library and computer.

This being Silicon valley they have accessto all kinds of internet companies and personnel just like a cult! It's maddening and pervasive.I've been victimised for so many years I'm numb-literally.

The non technical type of person would have succumed long ago I think as they are so persistant as if what they are doing is infallable.

When they are having a Go at me my cyber surfing is muddled and obfuscated so much I think the Devil is right next to me looking over, under, around, and thru my shoulder. How could any human persons keep this up for so long and for what purpose..to keep going with what they started?

Because these are orders from on high? It is inhuman and the spectacle is public on this side of the apartment complex (and in the office computer room as well where at least ther4 is a plainly worded warning that they reserve (and practice with impunity) the right to monitor ANY AND ALL electronic communication and are Not afraid to make you crazy doing so. Commenting and laughing when they supect it will have the most agregious effect on me.

MY signal gets blocked, jammed, redirected, dropped, disconnected, like it was Arthur Fiedler and the Boston Pops. It"s been going on for almost a year now and I have to move cause I can't take much more and maintain quality of life this way.

This is HUD housing and feels like I am in the wrong type of place to be a disabled American regaining my health and sanity after 25 years on the streets. At least ther i could leave the area, I can't do that here.

Is this the Patriot Act at work? I hope not.

There has to be a LOT of collusion for this to go on as it has.

Can you guys check out the signals in this area and let me know what you find?

It CAN'T be legal. It's definately un-healthy. They sound desperate because I survive.

Yours Truly,  
Arnold
