

To Whom It May Concern:

As a blind consumer I want to express how difficult it is to buy accessible products. It is not fair that visually impaired patrons must research electronics before purchasing them. At this time only Panasonic manufactures accommodates their equipment to obey the law. If this practice continues millions of blind people will not receive basic rights to access information as it is stated by required guidelines. I ask that you do not let our visually impaired citizens have only a small selection on these electronics. Thank you, for your time in this matter.

Respectfully submitted,
