

To whom it may concern,
I'll make this as short and sweet as I can...Please, please, please, DO NOT allow anyone, or any company, or any Lobby to talk you into doing anything that takes anything out of or lessens the impact of the CVAA.

We, as Blind and Visually Impaired consumers need all the help we can get in order to be allowed to have the same right to access to the media as any other citizen.

So often in the past, the only way I could change a channel, adjust the volume, or access important items in the menu system was to get my spouse, or a neighbor, to come and do it all for me. I wasn't even able to go in and select a Pay-Per-View movie on my own!

And to not have access to the emergency alerts would be unforgivable!!!!

So, please do all that you can to give us access to these accessible electronics as readily as possible--preferably in the same manner as any other sighted consumer.

We should not have to beg a manufacture to provide us the access. Nor should we be expected to accept a product that is obsolete in order to do so.

Thank You, in advance for taking positive action on our behalf and for protecting our interests and not those of the Manufacturers and Cable/Satellite companies; who are only interested in making a larger profit.

Cordially,
Scott Carlisle
