

To Whom It May Concern:

Please do not crush the movement to make televisions and other similar devices more accessible to those of us who are visually impaired or blind.

I urge you to stick to the bargain that was told to us that there would be changes that would make it easier for us to enjoy the things that sighted people enjoy. We too like to have our television programs, our news, our weather, our movies and shopping options available in a way that is useable for us.

Please continue to support the needs of Visually Impaired and the Blind on this issue.

Sincerely,
Denise C. Dobbs
