

TO WHOM IT MAY CONCERN:

I do not wish to ignore my self-respect and beg your indulgence for accessible TV and equipment from a limited number of resource manufacturers. This only shows the lack of respect you have for individuals with visual impairment. Congress and those who are blind or visually impaired expect all equipment needed for accessible TV enjoyment will be available at any commercial outlet. All the original agreements should be kept and no changes made to water down the bill. I wish to be able to use all the controls needed to use video description etc., on my TV as any sighted person.

Sincerely,

Leroy Nash
