

For the past five days, I have had at least one call per day from people who allege they are working for "The Medical Health Care Center". all have a strong and distinct Asian/Indian-Continent accent. all refuse to give anything but a first name. Most of the numbers that show up in my caller ID are NOT U.S. phone numbers but, rather, numbers like 123ac or 79142. I have told EACH caller I am on the DO NOT CALL list, and to tAKE ME OFF their call list. no help, i get another call the very next day. none of them can tell me WHERE they got my information. the first two callers told me they were WITH A FEDERAL AGENCY, and when I told them they were required by law to tell me exactly WHAT federal agency, and to identify themselves fully by name and employee ID number, they just ignored that and jumped back into their canned or scripted speech telling me I am entitled to compensation for having taken birth control pills " such as Yaz, Yasmin, or Ocella" and that they do not want personal information from me. And then they proceed to ask if I was taking birth control pills, if so, for how long, and what type, and did I have any injuries like blood clots from taking them. I told them all that was VERY personal information and I had NO INTENTION of telling them anything. I have asked on whose behalf they are making these calls but am only told it is the Medical Health Care Center, a vague name that means nothing. One caller told me he was with the Department of ArKANsass, clearly an attempt at scamming, as no such department exists and he mispronounced the state name. I did take down today the number 567-252-5215, which I looked up and others have complained about calls from this bogus entity. I would like them to be shut down. Thank you.
