

Would it be Legal/Possible to have Multiple HF Stations read the Bible, to be heard by multiple Thousands (possibly More) using Short-wave receivers in India?

I have personally been involved in such Readings on 3.980Mhz (the Mid-West Bible Study from aprox 0420hrs PDT along with 3.975mhz (The "West Coast Bible study, held from aprox 0535hrs-40PDT to 0615hrs PDT)

Who would I contact in India to see if we could Begin HF Bible Studies on a daily Basis as we have been conducting here in the USA on: 3.8mhz from 0420hrs (the "Mid-West Bible Study) along with the "West Coast Bible Study on 3.75mhz from 0535hrs-40hrs until about 0615hrs (All times are PSD)? I have a "Local Missionary" Friend who would like to set-up a number of "Net Stations" to do the reading and supplying "Local Residents" via purchase or have donated SWL radios on which to listen to the Bible Studies?

Please Advise at your earliest Convenience,

Thank you.

Bill
