

Dear Hearing Health Care Provider:

CaptionCall is in the process of creating a list of professionals who are willing to help people with hearing loss find an authorized professional in their area to evaluate their hearing and, if appropriate, provide a professional certification that indicates they need a captioned telephone to communicate effectively on the phone. We would like to include you on this list.

By filling out the information below, I am willing to:

1. Provide a professional evaluation of individuals who may need to use a captioned telephone to communicate effectively.
2. For individuals who qualify, I can sign a professional certification form.
3. CaptionCall may provide my contact information on their website, on the telephone or through email to individuals who need a qualified and willing hearing healthcare professional to assess their hearing loss and eligibility for captioned telephone service.

Please fill out this form exactly how you would like the information to be presented to individuals who request help evaluating their hearing.
