

Imagine you lost your hearing but could still read. Imagine your mother or father or spouse lost their hearing or was born with a disability. Immediately they are a disenfranchised individual looking to make it in this world. Don't you or they deserve a chance or equal access. Having a disability makes it twice as difficult to survive in mainstream society. Our underprivileged deserve any small but significant accommodation to level the playing field. Do not erode our current Closed captioning system but broaden the services . It could be you or your family that may need this system!!!
