August 28, 2013

Dear Sir/Madame,

I am writing today in response to the FCC's Notice of Proposed Rulemaking which, among other things, proposes changes to the E-Rate program. Before delving into my response to the proposed changes, I want to first thank the FCC for your continued support for the E-Rate program. The E-Rate program provides critical discounts to assist schools (like mine) to obtain affordable telecommunications and internet access.

Union School Corporation is a small rural corporation where ERate funding is critical for daily corporate and educational needs. The ERate funds are used to provide critical communication and learning resources including internet access and phones. The members of the community served are unable to fund these resources for the school with the high poverty rate in the area.

The E-Rate program is a program succeeding in its mission. As the FCC moves forward with this NPRM, it is prudent to remain focused on the fact that E-Rate is a program that works and that any changes to the E-Rate program should be focused on expanding a successful program that has yet to reach its full potential. The current program, while needing some marginal updates to its structure, is most strained by increasing demand for E-Rate-supported services and persistently low funding. The single most effective step the FCC can take to bolster E-Rates current and future success is to provide \$5 billion in funding, an amount commensurate with current demand.

There are additional programmatic changes and restructuring that can provide additional efficiencies and savings. To rely solely on programmatic efficiencies, however, without providing additional new funding is a shortsighted solution, a policy that fails to address the program's most significant problem: inadequate funding.

I think this NPRM is an opportunity to tackle the important work of expanding a successful program. E-Rate is not a broken program that needs to be fixed; it is a successful program that schools and libraries continue to rely on, a program that must continue to provide funding critical for telecommunications and connectivity.

With increased demands on technology and communication resources, corporations have to update and upgrade services and equipment. The bandwidth usage has quadrupled over 5 years at our schools and is expected to increase as students and classrooms use available online educational resources, online classes and distance learning. As a result, our technology budget has increased six fold over 6 years which has tightened our funding resources for other necessities.

Thank you for considering my response as you move forward with your decision on the E-Rate program. I applaud the FCC for its continued efforts to protect the already oversubscribed E-Rate program by ensuring the future of this successful program. I urge you to support significant increased funding for the E-Rate program, and to ensure that the program and its limited resources are protected and preserved.

Sincerely,

Michele M. Christie
Technology Director
