To: Tom Wheeler,
Federal Communications Commission

Re: Proceeding #'s 13-84 & 12-137

Mr. Wheeler,

The FCC must change their cell phone standards to adequately protect public health. You MUST take into account that deleterious health effects are occurring at levels far below current standards. Currently the standards only protect us from the heating of our tissues (thermal effects). Cancer is occurring with non-thermal heating. The power you have vested in your position dictates that you must update these standards in order to justify your existence as part of our public entity. The people are depending on you in this opportunity to do what's right... We all know how the game is played by now and we're all watching your feet by now instead of listening to your words. We're out here doing our best. Are you? Please don't let us down and don't be a pawn in the hands of the corporations. They care not about you or me. This is your time to shine and really make a difference. What will you do with it?

Sincerely,

Clint Madison
