

I am having an avalanche of telemarketer calls on my house phone and my cell phone. You have satellites in space that can look down at me from 200 miles up and see if I have a joint in my sock. The NSA is listening to our phone calls and reading our emails. The cops and a bunch of corporate ass holes are using cameras to record our license plate numbers and creating a data base of who was where when. Why in the hell can you not stop the telemarketers from calling me???? I have had 15 calls in 5 days from 857-444-5657. I don't even answer out of state calls anymore but Google tells me that others have answered and the caller wants to sell me a home security system. Am I going to have to drive to their office and stop the calls myself????
