AFFIDAVIT OF Charyl Zehfus

State of Wisconsin

Sheboygan Count

I, Charyl Zehfus _____, attest that my statements are true to the best of my knowledge.

Comment round for FCC ET Docket No. 013-84 and ET Docket No. 03-137

1. My name is _Charyl Zehfus . My address is _N6158 N. 61st Street, Sheboygan, WI 53083_____.

2. I am retired librarian, and an active researcher/writer.

3. The FCC's failure to protect the health and safety of citizens by providing updated biologically- based RF safety limits on electromagnetic radiation exposure goes to the heart of the Chevron and Massachusetts v. EPA rulings on an agency's authority to disregard its Congressional mandate. Such agency action and inaction are "arbitrary and capricious...[and] otherwise not in accordance with law." (Massachusetts v. EPA, 549 U.S. 497, 534-535 (2007)).

4. Attached are documents showing the critical need to update RF limits to protect the population biologically, as listed below.

5. Please read and consider the information in Cellular Telephone, Russian Roulette, by Robert C. Kane, Motorola lead researcher and scientist, to understand the serious risks that today's unbridled wireless proliferation continues to impose on the population. The document cannot be uploaded here, but can be found at the following link, along with biological information on the author: <http://microondes.wordpress.com/2010/04/17/robert-c-kane-cellular-telephone-russian-roulette/>

6. Please read and consider **the attached** essay by Robert C. Kane showing the biological impact of 2nd hand radiofrequency (RF) radiation on all people.

7. Please read and consider the recent **attached study** that shows how chronic low levels of RF exposure produce oxidative stress reactions in the body, which may cause and contribute to numerous diseases and conditions: "Increasing incidence of burnout due to magnetic and electromagnetic fields of cell phone networks and other wireless communication technologies," by Ulrich Warnke and Peter Hensinger.

8. Since the FCC does not possess the expertise to set biologically-based radiofrequency radiation safety limits. EPA does. Therefore, the FCC should enlist Congress to direct the EPA to establish biologically-based radiofrequency radiation safety limits and provide the budget and resources to carry out that task. (2012 HR6358 was an excellent example of legislation to authorize the EPA to establish biologically-based radiofrequency radiation safety limits.) The FCC has a duty to the public to protect the public health and safety from harm from radiofrequency radiation. US citizens and tax payers deserve radiofrequency radiation safety limits based on biology, not physics. In order for the FCC to fulfill its Congressional mandate to protect the public health and safety from harm from radiofrequency radiation, it must update its RF safety regulations. Thank you.

Respectfully submitted by

Charyl Zehfus
