

I am writing to express concern about the proposed change in guidelines for exposure of citizens to RF/MW. I am one of millions of people who have been harmed by exposure to ambient RF/Wireless Signals. The standards should be biologically based and protect the public from non-thermal health effects . The currently proposed guidelines do not take into account non thermal biological health effects.

The guidelines do not take into account that in 2011 The International Agency for Research on Cancer (IARC) classified RF/MW as a Class 2B Possible Human Carcinogen (May 31, 2011). This is the same class as DDT, lead, dioxin, chloroform, gasoline, diesel fuel, fuel oils, welding fumes, and ethylbenzene. [Ref. - [http://www.iarc.fr/en/media-centre/pr/2011/pdfs/pr208\\_E.pdf](http://www.iarc.fr/en/media-centre/pr/2011/pdfs/pr208_E.pdf)]

Most exposure to RF/MW is involuntary and with no informed consent due to the proliferation of cell towers, WiFi and wireless utility meters and the general lack of public knowledge on the harm from exposure to RF/MW (i.e., people do not read user's manuals which warn not to hold phones and other devices to the head or body or know of the thousands of studies indicating harm from such exposure).
