

I realize E-rate is in need of reform, but not annihilation. Removing Web Hosting from the eligible items list would not only be detrimental to school budgets, but to teaching and learning. Our web presence is part of our education model. Parents, students and the community-at-large depend and demand that schools utilize 21st century tools. The "free" alternatives are not adequate for teaching in this day and age. Do not remove Web Hosting from the eligible items list.
