In reference to the § 63.71 Application of RMVDDS, LLC (d/b/a OMGFAST!)

My name is Annessa Griffith and I got the discontinuance letter for my internet services about three days ago and I will like a very valid reasons why my service will be discontinued. The OMGFAST! Service is very important and detrimental to me because I am a college grad student who is taking courses online at a school in another state and I need computer access. I also work from home and it is imperative that I have internet access 24/7. I don't have reliable services that provide instant access like OMGFAST! I could understand if I had ample time to find other source but this is too soon. I enjoy using this service and I don't have reliable access to gain because I have limited mobility. I have tried another service in the past and they didn't work, so my coworker told me about this service and I have been using it ever since. What do countless other people and I have to do to continue using this service? Please feel free to contact me at your earliest convenience at

Best Regards,
Annessa Griffith
