

We would please ask for your consideration in continuing to allow Web hosting on the list of E-rate eligible service. There is not an adequate alternative within the scope of available free website services to host a school district's website.

I believe all would agree that communication between a school and its stakeholders is one of the most critical components in a successful educational setting. Our website and the funding we receive from E-rate for Web hosting is a fundamental need for our District. Eliminating this service from the eligible services list will cause hardship to our District in the fact that we would need to make cuts in other educational areas to continue paying for this service.

Thank you for considering leaving Web hosting as an eligible E-rate service.
