

I am the Director of Technology for Essex County Public Schools. We are a small school system in a rural part of Virginia. Without E-rate on things like webpage hosting and Email. I would be unable to make ends meet. Our budget has been cut year after year and things like this make it possible for us to attempt to survive by getting the discounts from E-Rate. I am taking the time to fill this out to let you know this does effect people and we do care! Please keep e-rate on websites and email.
