

Fully fund school internet. Schools are requiring more and more internet and the infrastructure to support it. Funding is also needed for qualified tech employees to build and keep up these technical networks. A person can go out and get a bachelors degree in education and have a great career, while a bachelors in supporting technology in schools is not a respected career when it comes to pay. Schools are much technical than most private industry technical jobs. Its time to stop the high turn over and start respecting the back bone of education. (Technology)
