

This letter is in reference to the E-Rate NPRM, proceeding 13-184. At Strafford School, our technology program is growing exponentially. Our current bandwidth is not enough to support our devices with adequate bandwidth. We get all excited to try new learning only to have connections dropped or painfully slow.

I know this is just a matter of money...there is no doubt the need exists and has been demonstrated clearly over the past two years.

Please support our school and students as we move into a new era of education powered by technology. Please increase funding to match the demand, double the current funding to at least \$5 billion. Our students have to be the best in the world, our future as a country depends upon it.
