

While appreciate all of the help we get from ERate on priority 1 connections we are sorely in need of help with Priority 2 projects.

Primarily we need more wireless infrastructure upgrades here.

In addition it would be great to see ERate fund more types of items under Priority 2 like application servers and the telephone handsets we need for our VOIP users here.

As a rural school district we rely on the funds that ERate provides and very thankful for all of the grants that have been awarded to our school district over the last 10 years.
