**AFFIDAVIT OF Charyl Zehfus**

State of Wisconsin

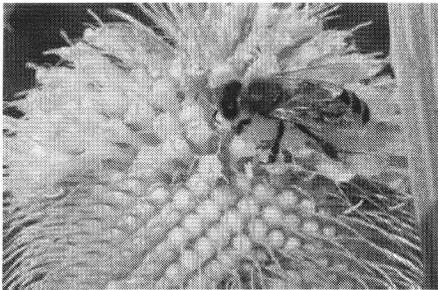

Sheboygan Count

I, Charyl Zehfus \_\_\_\_\_, attest that my statements are true to the best of my knowledge.

**Reply** round for FCC ET Docket No. 013-84 and ET Docket No. 03-137

1. My name is \_Charyl Zehfus . My address is \_N6158 N. 61<sup>st</sup> Street, Sheboygan, WI 53083\_\_\_\_\_.

2. I am retired librarian, and an active researcher/writer.

*When one tugs at a single thing in nature, he finds it attached to the rest of the world.*

**John Muir**

3. As the FCC is busy in this docket trying to determine if the outer ear is to be considered an extremity or not in order to allow more human radiofrequency exposure, out in the larger world many animals, insects and plants are in the process of decline. It appears to have begun in the 1990s and increased exponentially with the growth of unprecedented manmade electromagnetic radiation pollution. So, perhaps the question should not be how to classify the human ear, but how best to take precautions for these mysteriously dying life forms, our canaries in the mine, before it is too late?

If the creatures and plants could speak in this docket, they would ask us simply to protect their lives and homes. They would say they do not want to stop pollinating plants and crops or making our honey. They like their work. They would say they do not want to disappear from being our city friends. They enjoy a bustling life as much as we. They would tell us they do not want to stop dazzling us with their lovely, colorful migrations or eating mosquitoes at our cabins or farmlands in the dusk. Like us, they just want to keep doing what they do. Like us, they want to survive.

It must be rather exciting to be at a crossroads of policy and power where what you, the Federal Communications Commission of the United States of America, by your precautionary action of lowering manmade electro-smog, could prevent food system collapses, scarcities, unnecessary disease, riots, deaths, and even save life itself on the lovely blue planet we all call home.

4. Therefore, I submit that the FCC's **precautionary actions today towards biologically-based RF/MW limits would be useful** by saving creatures and plant-life that we depend upon from potentially devastating extinctions. **Adopting new biologically-based RF limits as an action would be efficient and practical since the collapse of our food chain would be much more costly than any perceived benefits** of currently popular manmade microwave and radiofrequency technology.

5. Please read and ponder the attached studies and reports:

\*"Impacts of radio-frequency electromagnetic field (RF-EMF) from cell phone towers and wireless devices on bio-system and ecosystem – a review"

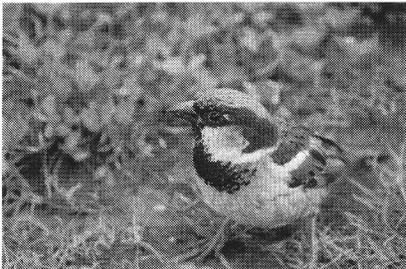

\*"Bees, Birds and Mankind: Destroying Nature by 'Electro-smog'"

\*"Passer Domesticus – A Disappearing Species Due to Increasing Effects of Electromagnetic Radiations (EMRs)"

Thank you.

Respectfully submitted,

Charyl Zehfus, concerned human
