

I strongly recommend that Video Relay Services including Purple and Sorenson should continue its services as usual and I don't want to lose video relay service and videophone because I don't like being lonely and isolation and could lead to loss of independence getting taken away and that's something I don't want that to happen here in the Tri-State area (Cincinnati to be exact). I'm serious about keeping my videophone both NTouch PC on computer w/ my webcam plus NTouch VP (NVP) here at home.
