

Thank you for receiving our comments.

E-Rate funding has helped us tremendously and has given our school district the ability to provide sufficient internet bandwidth to our students. However, our concern lies in Priority 2 services. Although we apply, E-Rate funds run out before it reaches our Free & Reduced percentage. We have struggled to provide the internal networking infrastructure necessary to keep up with the school's technology demands. So, we have plenty of bandwidth from the school to our internet provider, but lacking modern networking hardware within the schools because it is funded differently.

Thank You,

Mark
