Comments on Notice of Inquiry, ET Docket No. 13-84

Office of the Secretary  
Federal Communications Commission  
445 12<sup>th</sup> St SW  
Washington, DC, 20554

Dear Sir:

Recent research shows that there are negative biological effects to humans from the radio frequencies from cell phone towers and cell phones. The current FCC standards are based on dated research and are inadequate to protect people from current RF exposures. Fetuses and children are the most vulnerable to the damaging effects of RF and, I believe, new standards need to be much more restrictive to protect them.

Sincerely,

Cheryl Harter, MD
