Regarding CenturyLink's 10-90 proposal for funds to serve "unserved areas in Montana:

Attached in an Excel spreadsheet, please see data from the FCC Form 477 submission we do bi-annually, supporting the fact that we do have subscribers meeting the minimum criteria in these contested census blocks and tracts.

Further support in the form of redacted invoice showing addresses in each census block can be provided upon request.

On behalf of Little Apple Technologies and all other Wireless Internet Service Providers in our area who currently have customers in these contested census blocks, we strongly oppose funding to CenturyLink thus subsidizing the erosion of our existing customer base.

Paul Tackett, CEO

Little Apple Technologies
