

I cant believe that you have let the cable companies now scramble limited basic tv channels forcing us to RENT converter boxes the one they give you for a short time Free do not let the HD come through so now you have to RENT a box at a extra cost to consumers to get the same thing we got before you changed the law. This is a blatant corrupt act against the American consumer by the FCC for corporation profits. I have no way to change my provider were I live do to no Verizon no dish will work and air is imposable I was quite happy with what I have now because of your half ass ruling I will now have to dole out an additional 20 dollars a month if I want my HD tv. just another way our government screws the American people
