

understated. Midstate hereby requests that these census blocks be removed from the Bureau's unserved List, as Midstate has built fiber to these areas in its BIP project and currently serves these areas with speeds far greater than 4 Mbps downstream and 1 Mbps upstream.

At the time the last broadband information was provided for the NBM, Midstate's BIP project was still being constructed. However, now that the BIP project has been completed, Midstate is now serving the Chamberlain and Oacoma, SD Exchanges, which cover these census blocks, with speeds of 10 Mbps downstream and 1 Mbps upstream. Midstate did bring these changes to the attention of the South Dakota Bureau of Information and Telecommunications (BIT - SD NBM entity) and worked with BIT during the July – October 2012 timeframe to update the state and NBM information. The BIT South Dakota Broadband Mapping program, under the NTIA's State Broadband Initiative, updated the South Dakota maps with the NTIA on October 1, 2012, however the Bureau's List in this Public Notice is based on data as of June 2012. Therefore, the attached Appendix A provides the most current broadband service data regarding the blocks on Appendix A. Also included with this filing as documented evidence for Midstate's service in the respective census blocks, is an Affidavit from Mark Benton, General Manager of Midstate, as well as redacted customer bills attached hereto as Appendix B.

The May 21st FCC Order³ directed the Bureau to work with USAC, NTIA and RUS to ensure that Phase I support is not provided to areas that received ARRA Stimulus funding. The May 21st Order also directed Price Cap Carriers to certify they engaged in due diligence and reviewed publicly available sources to ensure the census blocks they elected to serve were not part of BIP or BTOP projects.

³ *Federal Communications Commission Report and Order*, WC Docket No. 10-90, FCC 13-73, para. 20 (rel. May 22, 2013).

Midstate also filed comments to the FCC on January 8, 2013 in response to the Further Inquiry in docket 10-90 into issues relating to the level of broadband service shown on the National Broadband Map (“NBM”) and eligibility for Connect America Phase I Incremental Support.⁴ Within those comments, Midstate requested that these census blocks be removed from the Bureau’s unserved List, as Midstate has built fiber to these areas in its BIP project and currently serves these areas with speeds far greater than 4 Mbps downstream and 1 Mbps upstream. These previously filed comments are attached as Appendix C.

Midstate’s BIP Award service area includes the Chamberlain and Oacoma, SD Exchanges, including all town and rural areas. Construction for Midstate’s Fiber to the Premises (“FTTP”) project was recently completed in September 2012 and provides broadband services to all requesting households, businesses and key community organizations in the Chamberlain and Oacoma, SD Exchanges that were lacking adequate service availability. Midstate’s FTTP project has provided the infrastructure to solve the previous lack of adequate broadband service in the Chamberlain/Oacoma Serving Area. The FTTP project has enabled the service area to overcome geographical distances, empower residents through Broadband information access and bring the world into their reach by the touch of computer keys. Midstate’s FTTP platform is capable of delivering 1 Gbps of bandwidth to each anchor institution, business and residential location constructed within the service area.

Midstate appreciates the opportunity to file these comments relating to areas shown as eligible census blocks that price cap carriers have requested funding to serve as part of the second round of Connect America Phase I. In conclusion, Midstate requests the census blocks

⁴ *Wireline Competition Bureau Seeks Comment on Areas Shown as Unserved on the National Broadband Map for Connect America Phase I Incremental Support*, WC Docket No. 10-90, Public Notice, DA 12-1961 (rel. December 5, 2012).

listed on Appendix A all within the Chamberlain and Oacoma, SD Exchanges be deemed as served for the reasons stated herein and be removed from the list of areas eligible for Phase I support going forward.

Respectfully submitted,

By: /s/ Mark Benton

AFFIDAVIT

I, Mark Benton, as general manager of and on behalf of Midstate Communications, Inc., have personal knowledge of the following:

- (i) Midstate Communications, Inc. has completed the build out of their FTTP stimulus project within the above listed blocks; and
- (ii) The above listed blocks are served with at least 4 Mbps / 1 Mbps broadband service as a result of Midstate Communications, Inc.'s stimulus project.

I verify under penalty of perjury that the foregoing is true and correct. Executed on September 20, 2013.

/s/ Mark Benton

**Before the
FEDERAL COMMUNICATIONS COMMISSION
Washington, D.C. 20554**

In the Matter of)
)
Connect America Fund) WC Docket No. 10-90
)

COMMENTS OF MIDSTATE COMMUNICATIONS, INC.

Midstate Communications, Inc. (“Midstate”) respectfully submits the following comments to the Federal Communications Commission (“FCC”) in response to the Further Inquiry in this docket into issues relating to the level of broadband service shown on the National Broadband Map (“NBM”) and eligibility for Connect America Phase I Incremental Support (“Public Notice”).¹

The census blocks listed within Appendix A attached hereto, which appear on the Wireline Competition Bureau’s list of potentially unserved census blocks in price cap areas² (“List”), are inaccurately reported on the List as unserved for the reasons Midstate’s provides herein. The blocks listed on Appendix A are served by Midstate through the Broadband Initiatives Program (“BIP”). Midstate was awarded a BIP Grant and Loan Award on September 21, 2010 and recently finished the project in 2012. Thus, within the census blocks listed within Appendix A, the NBM coverage and FCC data is understated. Midstate hereby requests that

¹ *Wireline Competition Bureau Seeks Comment on Areas Shown as Unserved on the National Broadband Map for Connect America Phase I Incremental Support*, WC Docket No. 10-90, Public Notice, DA 12-1961 (rel. December 5, 2012).

² *Wireline Competition Bureau Updates the List of Potentially Unserved Census Blocks in Price Cap Areas and Extends the Deadline for Comment on the List*, WC Docket No. 10-90, Public Notice, DA 12-2001 (rel. December 10, 2012).

these census blocks be removed from the Bureau's unserved List, as Midstate has built fiber to these areas in its BIP project and currently serves these areas with speeds far greater than 4 Mbps downstream and 1 Mbps upstream.

At the time the last broadband information was provided for the NBM, Midstate's BIP project was still being constructed. However, now that the BIP project has been completed, Midstate is now serving the Chamberlain and Oacoma, SD Exchanges, which cover these census blocks, with speeds of 10 Mbps downstream and 1 Mbps upstream. Midstate did bring these changes to the attention of the South Dakota Bureau of Information and Telecommunications (BIT - SD NBM entity) and worked with BIT during the July – October 2012 timeframe to update the state and NBM information. The BIT South Dakota Broadband Mapping program, under the NTIA's State Broadband Initiative, updated the South Dakota maps with the NTIA on October 1, 2012, however the Bureau's List in this Public Notice is based on data as of December 2011. Therefore, the attached Appendix A provides the most current broadband service data regarding the blocks on Appendix A.

Midstate's BIP Award service area includes the Chamberlain and Oacoma, SD Exchanges, including all town and rural areas. Construction for Midstate's Fiber to the Premises ("FTTP") project was recently completed in September 2012 and provides broadband services to all requesting households, businesses and key community organizations in the Chamberlain and Oacoma, SD Exchanges that were lacking adequate service availability. Midstate's FTTP project has provided the infrastructure to solve the previous lack of adequate broadband service in the Chamberlain/Oacoma Serving Area. The FTTP project has enabled the service area to overcome geographical distances, empower residents through Broadband information access and bring the world into their reach by the touch of computer keys. Midstate's FTTP platform is

capable of delivering 1 Gbps of bandwidth to each anchor institution, business and residential location constructed within the service area.

Midstate appreciates the opportunity to file these comments relating to areas shown as unserved on the NBM for Connect America Phase I Incremental Support. In conclusion, Midstate requests the census blocks listed on Appendix A all within the Chamberlain and Oacoma, SD Exchanges be deemed as served for the reasons stated herein and be removed from the list of areas eligible for Phase I support going forward.

Respectfully submitted,
