**CENSUS BLOCK CHALLENGE OF
N.E. COLORADO CELLULAR, INC. d/b/a VIAERO WIRELESS**

N.E. Colorado Cellular, Inc. d/b/a Viaero Wireless ("Viaero"), by counsel and pursuant to the Commission's Public Notice, DA 13-1832, hereby files its Census Block Challenge ("Challenge") in the above-captioned proceeding.¹ In the *CAF Phase I Round 2 Public Notice*, the Commission invited parties to challenge the list of potentially eligible census blocks submitted by price cap carriers as being unserved and thus eligible for the Connect America Fund ("CAF") Phase I second round of funding.² This Challenge is being filed to provide the Commission with a list of census blocks (along with supporting evidence) where Viaero is currently offering and providing a fixed wireless Internet access service at or above the requisite broadband speeds of 3 Mbps downlink and 768 kbps uplink. Accordingly, the census blocks identified in this Challenge should be removed from eligibility from the CAF Phase I second round of funding.³

¹ See *Wireline Competition Bureau Publishes Census Blocks, And Commences Challenge Process, For Second Round of Connect America Phase I*, Public Notice, DA 13-1832 (rel. Aug. 28, 2013) ("*CAF Phase I Round 2 Public Notice*").

² *Id.* at 1 ("Interested parties have 30 days from the release of this public notice to challenge price cap carriers' Phase I deployment plans by demonstrating that a block in question is already served by fixed Internet access with the requisite speeds.").

³ See *Connect America Fund*, Report and Order, FCC 13-73 at ¶ 33 (rel. May 22, 2013) ("*CAF Phase I Round 2 Order*") ("Where the Bureau finds it more likely than not that the status of a census block should be treated

I. INTRODUCTION

Viaero is a provider of commercial wireless fixed and mobile service in Colorado, including substantial rural areas of the state. Viaero has used universal service support to extend its wireless network and today serves many small towns and rural roads that could not otherwise be served without high-cost support.

Viaero currently offers a fixed wireless Internet access service to subscribing customers. This fixed service offers customers access to broadband service, in their home, with speeds at, or in excess of, 3 Mbps (downlink) and 768 kbps (uplink). With the wireless router offered by Viaero as part of the fixed wireless service, customers can establish a local-area network ("LAN") at home through the use of the router's Ethernet port or built-in WiFi that then provides customers with high-speed broadband access for computers and other devices in the home.⁴ We have provided in Attachment A to this Challenge sample advertisements used by Viaero for its fixed Internet access service providing data speeds at or above 3 Mbps (and up to 8 Mbps) (downlink), and at or above 768 kbps (and up to 2 Mbps) (uplink), in Viaero' 4G coverage areas.⁵

II. VIAERO CURRENTLY PROVIDES FIXED INTERNET ACCESS SERVICE IN NUMEROUS CENSUS BLOCKS IN COLORADO THAT ARE IDENTIFIED AS BEING ELIGIBLE FOR CAF PHASE I SECOND ROUND SUPPORT

When electing to receive Phase I second round support, price cap carriers were required to provide a list of those census blocks unserved by 3 Mbps/768 kbps Internet access in which

differently than the status shown on the National Broadband Map, the Bureau will deem that census block as served or unserved, as appropriate, for the purposes of Connect America Phase I.").

⁴ See <https://www.viaero.com/plans/type/fixed>.

⁵ See Attachment A.

they intend to deploy to meet their buildout obligations.⁶ At the same time, the Commission invited interested parties to challenge this list by demonstrating that a census block is in fact served by fixed Internet access with speeds of 3 Mbps/768 kbps or higher.⁷

After careful analysis, Viaero has determined that it already provides, over its 4G network, a qualifying fixed wireless Internet service (*i.e.*, 3 Mbps/768 kbps) in numerous census blocks on the price cap carrier's list. A list of those census blocks where Viaero already provides this coverage is attached hereto as Attachment B.

In addition, attached hereto as Attachment C, Viaero is providing the Commission with several maps demonstrating the census blocks in Colorado that price cap carriers have preliminarily designated as unserved, but where Viaero provides coverage.⁸

Attachments B and C were created by Mr. Thomas Burnett, Viaero's Vice President of Technical Operations and Chief Technical Officer. An engineering declaration, including a description of Mr. Burnett's qualifications, is attached hereto as Attachment D.⁹

Mr. Burnett overlaid Viaero's 4G coverage map onto the Commission's census block map, and performed an analysis of each census block to determine whether a tower operated by Viaero and offering 4G fixed wireless Internet access service provides coverage at the requisite 3

⁶ See *CAF Phase I Round 2 Order* at ¶ 31. As set forth by the Commission, parties may contend that a census block is completely unserved (*i.e.*, lacks speeds of 768 kbps/200 kbps and thus is eligible for \$775 in funding), is unserved by 3 Mbps/768 kbps but served by 768 kbps/200 kbps (thus is eligible for \$550 in funding), or is served by 3 Mbps/768 kbps (and thus is eligible for no support). *Id.*

⁷ *Id.* at ¶ 32. See also *CAF Phase I Round 2 Public Notice* at 1.

⁸ The green dots on the maps represent Viaero customers subscribing to the Company's fixed Internet access service. Census blocks identified by CenturyLink as eligible for CAF Phase I Second Round support are drawn in red. Viaero's 4G coverage area is represented in blue and include the areas in Morgan County, Otero County, Saguache County, Washington County and Yuma County where Viaero's fixed Internet access service at speeds at or above 3 Mbps (downlink) / 768 kbps (uplink) is offered.

⁹ See Attachment D.

Mbps (down) / 768 kbps (uplink) broadband speeds. Those census blocks that have such coverage are listed in Attachment B and the coverage map is included as Attachment C.¹⁰

In addition, set forth at Attachment E is a signed declaration from Mike Felicissimo, Viaero's Executive Vice President and Chief Financial Officer, declaring that he has read this pleading and that Viaero offers fixed wireless Internet service to customers at or above 3 Mbps (downlink) / 768 kbps (uplink) in the census blocks identified in Attachment B.¹¹ Further, in accordance with the *CAF Phase I Round 2 Order*, accompanying this declaration are current customer billing records (redacted to preserve customer privacy) further demonstrating that Viaero is in fact providing its fixed Internet access in these areas.¹² While these are not all of Viaero's billing records for its fixed wireless Internet service, these sample billing records are simply intended to provide the Commission with additional evidence of the scope of the fixed wireless Internet access offered by Viaero in the census blocks identified in Attachment B and depicted in the map in Attachment C.

As shown in Viaero's advertising materials, the company provides customers with a fixed wireless access device that is placed inside the house. The fixed router device picks up 4G signal and radiates a local Wi-Fi network ("WAN") throughout the house. Alternatively, a customer may connect an Ethernet cord from a laptop/desktop into the device to obtain service. Because the device can be placed in any home or business throughout the area, or in an "out building"

¹⁰ See *CAF Phase I Round 2 Order* at ¶ 33 ("All filings in the challenge process, whether from a price cap carrier or another provider, must be supported by some form of documented evidence.").

¹¹ See *CAF Phase I Round 2 Order* at ¶ 33 ("In cases where another provider contests the price cap carrier's intention to serve, the Bureau may consider such evidence as a signed certification from an officer of the provider under penalty of perjury that it offers 3 Mbps/768 kbps Internet service to customers in that particular census block.").

¹² *Id.* ("Such [an officer] certification could be accompanied by current customer billing records, appropriately redacted to preserve customer privacy.").

such as a barn, outer office, or garage, Viaero believes that its 4G service is available throughout a much greater area than any wireline network operating in the region.

While Viaero sells these fixed devices on a “plug and play” basis, to ensure quality of service, Viaero has installation technicians that can be dispatched to customer homes – *i.e.*, a truck roll – at no cost to Viaero customers. Every customer ordering fixed service can get a visit from a Viaero technician who optimizes the device, ensures its proper placement, and installs an external antenna, if needed, to ensure quality of service that is at or above the broadband service level requested by the customer. As a result, Viaero is certain that its customers receive what they are paying for in terms of throughput, and it enables Viaero to assure the Commission that it is providing fixed Internet access service, at or above the required 3 Mbps / 768 kbps speeds, throughout the areas shown in the attached maps.

Viaero currently has over one thousand customers in Colorado who subscribe to its 4G stand-alone fixed Internet service and who subscribe to a service level that is at or greater than 3 Mbps (downlink) /768 kbps (uplink), while other Viaero customers have chosen a lower throughput, even though higher broadband speeds, at or greater than 3 Mbps (downlink) /768 kbps (uplink), are available. Viaero’s customers are scattered throughout Viaero’s 4G coverage area and Viaero offers this level of service throughout the census blocks included in this Challenge. Viaero’s network is less than two years old, and the uptake of its fixed product has far outstripped its expectations.

The evidence provided herein is sufficient to enable the Commission to make a determination that the census blocks listed in Attachment B already are served by a fixed Internet access service operating at, or in excess of, 3 Mbps (downlink) / 768 kbps (uplink). As a result, these census blocks should be made ineligible for CAF Phase I second round funding.

Respectfully submitted,

**Declaration of Thomas Burnett
Vice President - Technical Operations and Chief Technical Officer
N.E. Colorado Cellular, Inc. d/b/a Viaero Wireless**

Declaration of Thomas Burnett
Vice President - Technical Operations and Chief Technical Officer
N.E. Colorado Cellular, Inc. d/b/a Viaero Wireless

1. I, Thomas Burnett, am employed by Viaero as Vice President, Technical Operations and Chief Technical Officer. I manage the company's wireless network, including all aspects of network design and deployment. I am familiar with the FCC rules for the Commercial Fixed and Mobile Services.

2. For purposes of the preparing the material set forth in Attachments B and C to the foregoing Census Block Challenge, I overlaid a map of each unserved census block listed by the Commission for the State of Colorado as part of the Commission's Public Notice for the Connect America Fund Phase I Round 2 funding. *See Wireline Competition Bureau Publishes Census Blocks, And Commences Challenge Process, For Second Round of Connect America Phase I, Public Notice, DA 13-1832 (rel. Aug. 28, 2013) ("CAF Phase I Round 2 Public Notice")*. I then performed a coverage analysis of each Viaero cell site that uses 4G with Reference Signal values equal or greater than -85 dBm RSSI using Optimix Wizard ver. 8.2, a highly specialized propagation tool used by engineers to predict and model coverage to ensure appropriate coverage when designing wireless networks. Wizard software is widely accepted by engineers designing commercial mobile wireless networks and it is an essential tool for selecting, among other things, site locations, antenna height, antenna type, and power levels.

3. Based up on my review, I hereby state that Viaero is providing coverage in the Census Blocks listed in Attachments B and C and Viaero is capable of provisioning service in those Census Blocks at a speed at or above 3 Mbps downlink and 768 kbps uplink.

4. I have read the foregoing Census Block Challenge, including Attachments B and C, and they are true and correct to the best of my knowledge, information and belief.

I declare, under penalty of perjury, that the foregoing is true and correct to the best of my knowledge, information and belief.

Thomas Burnett
Vice President - Technical Operations and
Chief Technical Officer
N.E. Colorado Cellular, Inc. d/b/a

ATTACHMENT E

**Declaration of Michael Felicissimo
Executive Vice President and Chief Financial Officer
N.E. Colorado Cellular, Inc. d/b/a Viaero Wireless**

**Declaration of Michael Felicissimo
Executive Vice President and Chief Financial Officer
N.E. Colorado Cellular, Inc., d/b/a Viaero Wireless**

1. My name is Michael Felicissimo, and I am the Executive Vice President and Chief Financial Officer of N.E. Colorado Cellular, Inc. d/b/a Viaero Wireless ("Viaero") and I am responsible for the day-to-day operations of the company's wireless network and all of the company's financing activities.
2. Throughout Viaero's 4G network, Viaero currently offers a fixed wireless broadband service to subscribing customers. This fixed wireless service provides customers with access to an Internet broadband service in their home with speeds at, or in excess of, 3 Mbps downlink and 768 kbps uplink. With the wireless router offered by Viaero, customers can establish a wide-area network at home through the use of the router's Ethernet port, or built-in WiFi that provides customers with high-speed broadband access for their computers and other devices at home.
3. Viaero currently provides 4G coverage and offers its fixed wireless Internet service in each of the census blocks identified in Attachment B to the foregoing Census Block Challenge. In each of these census blocks, Viaero offers its fixed wireless Internet service to customers at speeds at or in excess of 3 Mbps downlink and 768 kbps uplink.
4. As further evidence of Viaero's service offerings in the census blocks identified in Attachment B, attached to this Declaration are sample customer billing records (redacted to preserve customer privacy) showing their subscription to Viaero's fixed wireless Internet service.
5. I have read the foregoing Census Block Challenge and I declare, under penalty of perjury, that the information contained therein, and in this declaration, is true and correct to the best of my knowledge, information and belief.

Michael Felicissimo
Executive Vice President and
Chief Financial Officer
N.E. Colorado Cellular, Inc.
