Attention: Chief, Wireline Competition Bureau

**Re: WC Docket No. 10-90  
Challenge to Windstream's Request for Connect America Fund Phase  
1(Second Round) Support**

Dear Ms. Dortch,

Texas Communications of San Angelo, Inc. (Texas Communications) hereby files this challenge to Windstream's request to receive support in the second round of the Connect America Fund Phase I ("CAF Phase I Round 2") to provide broadband service to locations within the census block 480819501.00, and Texas Communications respectfully requests that the Wireline Competition Bureau take into account the evidence provided here that the census block listed does not meet the requirements spelled out by the FCC for Windstream to receive Price Cap Support in this area.

The FCC, on August 28, 2013, released a Public Notice (DA 13-1832) which instructed interested parties "to challenge price cap carrier's Phase I deployment plans by demonstrating that a block in question is already served by fixed internet access with the requisite speeds." (1) The Public Notice included a list of all census blocks that the price cap carriers are requesting to receive CAF Phase I Round 2 support to provide broadband. Texas Communications has identified census blocks in the list that are already being offered speeds of at least 3Mbps download and 768kbps upload by Texas Communications.

(1) Wireline Competition Bureau Publishes Census Blocks, and Commences Challenge Process, for Second Round of Connect America Fund Phase I, WC Docket No. 10-90, Public Notice, DA 13-1832 (rel. August 28, 2013)

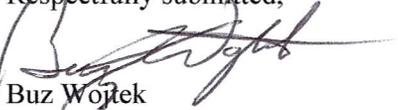

Marlene Dortch, FCC  
September 25, 2013  
Page 2 of 2

Texas Communications hereby certifies under penalty of perjury that it provides Terrestrial Wireless Broadband in the census block 480819501.00 with download speeds in excess of 3Mbps and upload speeds in excess of 768 Kbps. Texas Communications has documented service in census block 488819501.00 through our FCC Form 477 filings for several years.

Enclosed is a copy of Texas Communications internet rate sheet which includes the census tract 480819501.00. Also enclosed is a copy of an invoice for service with download speed in excess of 3 Mbps and upload speed in excess of 768 Kbps.

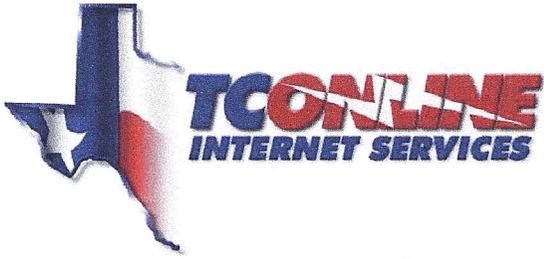

In conclusion, Texas Communications does offer internet service in census tract 480819501.00 in excess of 3 Mbps download and 768 Kbps and does so without CAF support. Giving CAF support to Windstream would create an unfair competitive advantage for Windstream in the 480819501.00 census tract and therefore we request the FCC remove census tract 480819501.00 from CAF Phase I round 2 eligibility.

Respectfully submitted,

Buz Wojtek  
VP Operations
