

WMTV in Madison is currently asking for comments on their license renewal.

How is it in the Public Interest that TV stations are allowed to broadcast political adds that are misleading or outright lies? When will the FCC start to hold TV stations accountable and restrict this type of advertisement? If a Product advertisement misinformed consumers as much as these Political adds do, you would make them pull the add.

These type of adds line the pockets of broadcast owners and do not "inform" the public.
