Emergency Functionality Explanation Document:

The company maintains emergency backup power for the local distribution plant and central office and transmission facilities that keep the company functional in an emergency which deprives the company equipment of commercial electrical power.

The central office facility is powered with commercial electric power and battery banks that continue power to the office and transmission equipment for a period in excess of 350 hours in the event of a power source outage. The central office is equipped with a bi-modal, solar-photovoltaic power system that includes a large battery bank capable of operating the company's telephone switch for a full week of limited to no solar input. In addition, the central office is equipped with a LPG-fired engine-generator set with a fuel capacity of 150 hours of additional generation capacity to continue supplying power in the event of a power outage. The company can remain operational in the situation.

The company's customer distribution network, transmission equipment, field cabinets & customer pedestal electronics do not have, or require, power backup. This contingency is not necessary to maintain customer service in the event of a commercial power outage.

The company has additional route capacity to keep emergency service (911 service) available in the event of an emergency situation. The company also supplies emergency answering points ("Knox Box" and inside the central office) for emergency personnel in the event of an isolation or emergency situation. In addition, the central office is equipped with an emergency radio system capable of contacting emergency services in the event 911 service becomes unavailable.
