**AT&T MOBILITY'S CERTIFICATION REGARDING ITS ABILITY TO FUNCTION IN
EMERGENCY SITUATIONS**

Section 54.313(a)(6) of the Commission's Rules requires an ETC to certify an ability to function in emergency situations as set forth in section 54.202(a)(2) of the Commission's Rules. Furthermore, the State of Washington requires an ETC to annually certify that it has adhered to the requirements in WAC 480-123-030(1)(g). WAC 480-123-030(1)(g) requires wireless providers that are ETCs to have "four hours of back up battery power at each cell site, backup generators at each microwave hub, and at least five hours back up battery power and backup generators at each switch." The standards set forth in section 54.202(a)(2) include a reasonable amount of back-up power to ensure functionality without an external power source, an ability to reroute traffic around damaged facilities and a capability to manage traffic spikes resulting from emergency situations. AT&T Mobility has in place emergency operation procedures so that it can function in an emergency. Backup power is provided at switch locations and cell sites through a combination of batteries, portable and permanent generators. AT&T Mobility also has mobile switches and portable COWs (Cells on Wheels) that it can deploy in the event of an emergency. Based on the foregoing, AT&T Mobility certifies it is able to function in emergency situations as set forth in section 54.202(a)(2) and as required by the State of Washington.
