Information of this nature is confidential commercial information routinely withheld from public inspection.

4. With respect to identifying the degree to which the attachment concerns a service that is subject to competition, the information pertains to the network and operations of a telecommunications company that has competitors that could benefit if they were able to have access to this information.
5. With respect to identifying possible exposure to competitive harm, the information contained in the attachment is information that is not customarily released to the public. Because the telecommunications market is highly competitive, release of this information could substantially harm the Company's telecommunications business.
6. With respect to steps the Company has taken to ensure against unauthorized disclosure of the information contained in the attachment, the Company is filing the attachment under seal. The attachment has also been filed with the New Mexico Public Regulation Commission under seal.
7. Any previous versions of this information are not publicly available.
8. Because the information is not routinely available, a need exists for maintaining the confidentiality of this information permanently.
9. The Commission has previously concluded that there is a presumptive likelihood of substantial competitive harm from disclosure of outage information.⁵ The Commission also determined the disclosure of outage reporting information to the public could present an unacceptable risk of more effective terrorist activity and could therefore result in potential harm to the public and the national defense.

Based on the preceding, JSI respectfully requests on behalf of the Company that the Commission grant confidential treatment under Section 0.459 to FCC Form 481 attachment at Line 200, Service Outage Reporting. Please contact the undersigned with any questions regarding this request.

Sincerely,

John Kuykendall

Compliance

In establishing this certification in its *2005 ETC Order*,¹ the FCC found that an ETC must make “a specific commitment to objective measures to protect consumers.”² The FCC found that for wireless ETCs, compliance with CTIA’s Consumer Code for Wireless Service would satisfy this requirement” and that the sufficiency of other commitments would be considered on a case-by-case basis.³ In this context, the FCC stated, “to the extent a wireline or wireless ETC applicant is subject to consumer protection obligations under state law, compliance with such laws may meet our requirement.”⁴

Leaco Rural Telephone Cooperative, Inc. (“Company”) hereby certifies that it is complying with applicable service quality standards and consumer protection rules. The Company complies with current service quality and consumer protection provisions under state and federal law. These provisions include, but are not limited to, the following: 1) consumer protection rules delineated in Title 17, Chapter 11, Part 16 of the New Mexico Administrative Code; 2) quality of service regulations found in Title 17, Chapter 11, Part 22 of the New Mexico Administrative Code; 3) slamming and cramming protections outlined in Title 17, Chapter 11, Part 8 of the New Mexico Administrative Code; 5) infrastructure and high speed data service

Leaco Rural Telephone Cooperative, Inc. ("Company") hereby certifies that it is able to function in emergency situations as set forth in the Code of Federal Regulations, Title 47, Part 54, Subpart C, §54.202(a)(2).¹ The Company's network is designed to remain functional in emergency situations without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations as required by Section 54.202(a)(2). Changing call routing translations also allows the Company to manage traffic spikes throughout its network, as emergency situations require.

Specifically, the Company is able to function under emergency operations in accordance with part 17.11.22.10 of the New Mexico Administrative Code. Specifically, these regulations require telecommunications service providers to maintain a minimum of four hours of battery reserve rated for peak traffic load requirements and to have available a mobile power unit which can be delivered and connected within four hours. The New Mexico regulations also require all local exchange carriers to establish and maintain a written emergency procedure plan and to train employees on such procedures. All such plans are on file with the New Mexico Public Regulation Commission.

¹ Section 54.202(a)(2) requires ETCs that are designated by the Commission to "demonstrate its ability to remain functional in emergency situations, including a demonstration that it has a reasonable amount of back-up power to ensure functionality without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations."
