

Clarixa Quinones

Bayamon, PR 09590

As a retired Technology teacher in Puerto Rico's Department of Education I know that seamlessly infusing digital learning throughout the curriculum is a prerequisite for students to graduate from high school with the skills and knowledge they need to succeed in today's global economy. Access to high-speed broadband is the key to allowing modern teaching and learning to occur in all schools across the country. This is more important in schools like the one I work that are in poverty and non secure areas, access to internet could be the difference to help those kids get to educational opportunities they can't access otherwise.
