

Dr. Benitha D. Mathews

Hayneville, Alabama

I currently serve as the District Technology Coordinator for our rural school district. The discount funding provided by the FCC has been of great value to our school district. Most of our schools struggle just trying to pay their phone bills. In addition, our plans to implement a 1:1 was put on hold because of a company's failure to complete the broadband implementation. Only 50% of our students have Internet access at home which makes this initiative difficult fulfil.
