Federal Communication Commission.

Attion: Comm- Megnon Clyburn

Smart Grid Technology.

Docket # 13-39.

For Comments on R.F. Exposures.

The F.C.C. needs to give the States the authority to, help control R.F. emissions. Plus other forms of Electromagnetic Emmissions.

Understanding in the 1990's about 34 million cell phones where in use, by 2010 over 285 million.

The number of cell towers also took a chnge. In 1995 19,844 towers to 2010 with 251,616 towers.

These numbers are Rer: from Orlean Koeckle President of Eagle Forum.

Other forms of growing R.F. problems include Smart Gride, Wi-Fi and Lan's.

When I thank of all the ways one product is taxed. But when it comes to protecting the public from harmful R.F. Only the F.C.C. has the control to protecting the public.

The F.C.C. is being out paced by technology.

Sincerely

Paul Meyer
