California

Los Angeles

I, Kevin Mottus, attest that my statements are true to the best of my knowledge.

**Comment** round for FCC ET Docket No. 013-84 and ET Docket No. 03-137

1. My name is Kevin Mottus My address is 11041 Santa Monica Blvd. #209
2. I am a social worker.
3. Municipalities across the country have repeatedly asked for a say about where cell phone towers are placed and demand a right to discuss and debate the health effects associated with Radio Frequency Radiation exposure (see attached motion by the Los Angeles Board of Supervisors). The 1996 Telecommunications Act by banning discussion of health effects by local municipalities essentially passed a gag order on the country and in doing so in essence prevented citizens from exercising their democratic right for freedom of speech and even more importantly their right to keep themselves and their families safe and out of harms way from the health effects resulting from RF radiation exposure used by wireless in all its forms from cell phones, cell towers and WiFi (see attached bulletin from the World Health Organization classifying the microwaves from wireless as a Class 2B carcinogen, see studies showing biological effects from WiFi). By passing the 1996 telecommunications act, these politicians influenced by the wireless industry and their campaign contributions to political candidates have sold the health and well being of every citizen exposed to RF radiation from wireless. This is wrong. We are not for sale. This is legal corruption and a thwarting of every Americans basic civil rights.
