Los Angeles

I, Kevin Mottus, attest that my statements are true to the best of my knowledge.

Comment round for FCC ET Docket No. 013-84 and ET Docket No. 03-137

1. My name is Kevin Mottus My address is 11041 Santa Monica Blvd. #209

2. I am a social worker.

3. Look at the attached three videos from different groups from the US, Australia, and Canada representing people who are suffering from health effects due to WiFi and Wireless Tablets in schools. They have taken the time to make these videos and report on the news because people do not want their children microwaved all day long with a World Health Organization Class 2b Carcinogen. They do not want their children to be used in a massive experiment as you microwave our young without our FCC guidelines covering children or pregnant women explicitly even if the guidelines were effective safety standards which they are not. You cannot even say that your inadequate FCC guidelines due to the fact that they only cover thermal effects do not even cover and protect children yet you find it okay to permit no promote WiFi and Wireless Tablet use in our schools.

4. This is not equal access to technology- this is equal access to the behavioral, developmental problems and diseases including cancer, heart attacks and immune system diseases which have increased in the wealth populations you say already have access to these non-essential technologies. With David Carpenter MD Albany University swearing that the microwaves used in WiFi and wireless tablets in schools are carcinogenic, neurotoxic and genotoxic and he provides 22 pages of cited scientific studies to support this belief, how can you implement WiFi and Wireless tablets in schools like it is harmless and there is no health concern that parents should be notified of and have to consent to?(see attached sworn declaration of David Carpenter MD) Knowing this how can you allow the schools implementing this technology not track health effects or educate its stakeholders?
