Dear FCC Commissioners,

“Wireless Technology Violates Human Rights: How universal exposure to radiation from wireless devices complying with existing inadequate safety limits violates the Nuremberg Code of Ethics” addresses very serious issues that I hope you will give full consideration to as required under *Scenic Hudson v. Federal Power Commission* and perform the NEPA evaluation and EIS that are necessitated by the presence of two options which have the potential to have radically different impacts *Burkholder v. Peters*, 58 F. App’x 94, 96 (6th Cir. 2003) (quoting 42 U.S.C. § 4332(2)(C)). The EIS should include a review of the impact of both options (leaving the RF limits at the same outdated solely thermally protective levels vs. lowering them to biologically-protective levels) on the environment, as well as on human health and safety.

Sincerely,

Catherine Kleiber
