

Supreme Court of India Orders Cell Towers Removed From Schools, Hospitals

Cell towers are being dismantled by the thousands in various parts of India.

On November 27, 2012 the High Court of the state of Rajasthan, India's largest state geographically, ordered the removal of all cell towers from the vicinity of schools, colleges, hospitals and playgrounds because of radiation "hazardous to life." The court's amazing 200-page decision thoroughly reviews the worldwide evidence that cell towers are harming human beings and wildlife. It is available here:

On July 5, 2013 the Supreme Court of India upheld this decision.

And two weeks ago the city of Mumbai, the most populous city in India, prohibited cell towers in the vicinity of schools, colleges, orphanages, child rehabilitation centers, and old age

homes; ordered that nearby antennas should not be directed towards these types of buildings; and ordered that existing antennas on schools, colleges and hospitals be removed. It also prohibited the installation of antennas on residential rooftops without the consent of every person on the top floor, as well as the consent of 70% of the people in the rest of the building. And it will start the process of dismantling 3,200 illegal rooftop towers within the next few weeks.
