

Please do not allow our only local broadcasting NBC 40 TV station to go off the air. They keep their NJ brothers and sisters informed of what is happening in our area especially when it comes to weather or issues that concern all of us. Yes we have other TV stations however when big news happens here in NJ nothing but a blip gets reported because those networks are produced to report about what is happening in their areas and NJ gets left out. Please do not leave those of us who watch this station out in the cold and in the dark
